Office Action Summary	Application No. 10/693,820	Applicant(s) SANDBERG ET AL.	
	Examiner John A. Jeffery	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 409-413, 416-427, 429-434, 436-463, and 465 are generic to a plurality of disclosed patentably distinct species outlined below:

Species Group A

- (1) Heater section and method of heating comprising a single ferromagnetic material
- (2) Heater section and method of heating comprising a non-ferromagnetic material coupled to the ferromagnetic material
- (3) Heater section and method of heating comprising a second ferromagnetic material coupled to the ferromagnetic material
- (4) Heater section and method of heating comprising a composite material

Species Group B

- (1) Heater section and method of heating wherein the ferromagnetic material comprises a mixture of iron and nickel

Art Unit: 3742

(2) Heater section and method of heating wherein the ferromagnetic material comprises a mixture of iron and cobalt

Species Group C

(1) Heater section and method of heating wherein the heater inhibits vapor condensation in a wellbore

(2) Heater section and method of heating wherein the heater raises the temperature of the hydrocarbon material at or above the pyrolysis temperature

(3) Heater section and method of heating wherein the heater decontaminates contaminated soil

(4) Heater section to heat a subsurface formation wherein the heater initiates an oxidation reaction

(5) Heater section and method of heating wherein the heater produces a mixture from the formation

Species Group D

(1) Heater section and method of heating wherein AC is applied at about 180 Hz

Art Unit: 3742

(2) Heater section and method of heating wherein AC is applied at about 60 Hz

Species Group E

(1) Heater section and method of heating comprising producing refined products from produced fluids

(2) Heater section and method of heating comprising producing a blending agent form produced fluids

(3) Heater section and method of heating comprising blending produced fluids with hydrocarbons

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each Species Group A-E for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 3742

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Jeffery whose telephone number is (571) 272-
